Summary

Results-driven software engineer specializing in designing cloud-native systems and AI-powered applications. Focused on scalability, fault tolerance, and delivering high-availability solutions using AWS with high availability and low latency.

Experience

Shoptaki

Software Engineer Intern

Oct 2025 – Present

- Crafted and delivered user-centric landing pages and analytics dashboards using modern **Next.js** and **Tailwind CSS**, improving onboarding flow efficiency by **17%**.
- Integrated an **AI-agent handoff** workflow using **OpenAI** and **Gemini** models, enabling seamless AI-to-human transitions and reducing average support response time by **27%** while lowering escalation rates by **15%**.
- Designed AI-enabled backend services and REST APIs for decentralized identity and KYC orchestration, ensuring secure data handling, traceability, and audit-ready outputs.
- Collaborated directly with **founders** and engineers to ensure seamless end-to-end integration, accelerating feature delivery by **20%** and enhancing overall platform usability.
- Built AI-powered ID ingestion and verification workflows to securely extract and normalize identity data, reducing manual review effort while preserving confidentiality through encryption and role-based access controls.

HCL Technologies

Full Stack Developer — Client: DHL

Feb 2023 – Aug 2023

- Built and optimized Node.js/Express microservices integrated with React dashboards, reducing API response time by 40%.
- Automated CI/CD workflows using Jenkins and Docker, enabling daily deployments with zero production downtime.
- Delivered analytics platform for 50+ enterprise clients to track shipments and KPIs, cutting issue-resolution time by 35%.
- Partnered with cross-functional teams to improve operational visibility, boosting delivery accuracy and SLA compliance by 22%.
- Integrated AWS S3 and CloudFront for asset delivery, improving content load performance by 45% across global regions.

Frontend Developer — Client: DHL

May 2022 – Jan 2023

- Developed responsive React and Redux interfaces for real-time shipment tracking and reporting modules, improving load time by 55% across high-traffic, customer-facing workflows at scale in production environments.
- Integrated RESTful APIs with WebSocket-based updates for 10K+ daily active users, enhancing real-time data synchronization across dashboards during peak operational hours across regions.
- Enhanced customer portal UX, leading to a 25% increase in daily active sessions and reduced churn.
- Collaborated with UI/UX and backend teams to accelerate sprint delivery by 30%, improving release consistency, code quality, and cross-team development efficiency across multiple initiatives.
- Implemented component-level caching and lazy loading, reducing frontend data fetch latency by 35%.

System Engineer — Client: DHL BlueDart

Nov 2021 – Apr 2022

- Developed and deployed Spring Boot microservices for internal LMS managing 20K+ users and 50K+ monthly assessments.
- Automated infrastructure with Terraform and Docker, cutting provisioning time by 70% and ensuring consistent environments.
- Digitized training workflows, reducing manual reporting time by 60 hours/month and improving data accuracy.
- Delivered system updates with 99.9% uptime, ensuring uninterrupted learning and compliance across departments.
- Designed SQL indexes and optimized queries, reducing database query execution time by 50%.

Skills

Programming: Java (Advanced), Python, JavaScript/TypeScript, C++, Android (Kotlin), SQL, Bash, REST APIs, JSON, XML

Frameworks: React JS, Node.js/Express, Spring Boot, PyTorch, Tailwind CSS, Next.js, Flask, Bootstrap, Redux

Cloud & DevOps: AWS (EC2, S3, Lambda, DynamoDB, RDS, CloudFront), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD Pipelines, Linux, Monitoring, CloudFormation, ELB, VPC, Autoscaling, Load Balancer, Deployment Automation

Databases & Data Stores: DynamoDB, MongoDB, MySQL, PostgreSQL, Redis, Elasticsearch, Firebase, Cassandra, SQLite

Software Engineering: API Development, Microservices Architecture, Distributed Systems, Load Balancing, Caching, Message Queues (Kafka/SQS), Fault Tolerance, Observability, Logging, Scalability, Monitoring (CloudWatch, X-Ray), Security

Tools & Methodologies: Agile (Scrum), Jira, Git, RESTful Services, System Design, Performance Optimization, Test Automation, Version Control, Code Review, SDLC, Documentation, DevSecOps, Continuous Delivery

Certifications

Certified SAgile 6 Agilist

Amazon AWS Certified Cloud Practitioner

Scrum Alliance Certified Scrum Master

Education

Pace University, New York, NY

Master of Science in Computer Science, Concentration: Software Development

Courses: Data Structures and Algorithms, Parallel Computing, Artificial Intelligence, Full Stack Development

Aug 2023 – May 2025

GPA: 3.8/4.0
